

Y TECHNOLOGY

NEW

> **Side Drivers:** an exclusive design based on a dual racquet construction that connects the racquet yoke and head for optimized power and precision.

> **Bi-material construction:** 2 complementary, highly innovative graphite structures:
- High Modulus Graphite for the racquet yoke = greater power
- Crystal Graphite for the racquet head = maximum precision

> **Grommet System:** Bi-material grommet system, fully integrated 360° positioning. Consistent energy absorption at the ball impact.
