

CORTEX SYSTEM TECHNOLOGY

Active vibration filter customized to player level needs

THE TECHNOLOGY CUSTOMIZED TO FILTER THE DIFFERENT TYPES OF VIBRATIONS

- > Vibrations which interfere with feel are filtered out: high frequency
- > Only the vibrations providing feel are maintained: low frequency

INTERFACE BETWEEN THE HANDLE AND THE FRAME

The two parts of the racquets are actively linked by the C.D.S (Cortex Damping System) which **filters and absorbs** vibrations to enhance the feel of the ball.
